

# CASSANDRA

The **Cassandra** – designed for the discerning gardener who appreciates quality and aesthetics. It is supplied with full pane toughened glass throughout and the elegant bar capping, which secures the glass panes, adds a great finishing touch to this superior quality greenhouse. The low-level threshold gives unimpeded access.

Cassandra is available in two sizes: 9.9 m<sup>2</sup> (8' x 12') and 11.5 m<sup>2</sup> (8' x 14'). Both sizes are available with powder coated black aluminium profiles.

Designed to sit on a single skin dwarf wall, the required height is 50cm, the dwarf wall increases the insulation of the greenhouse, and although the wall is not included with the greenhouse frame it enables the customer to choose the material which best suits their taste.

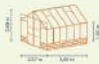

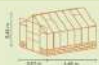

By absorbing heat in the daytime and releasing it at night, the dwarf wall reduces temperature fluctuations. This provides a more even temperature in the greenhouse around the clock, providing gentle growing conditions for crops in the greenhouse.

Cassandra 9900 Aluminium

Cassandra 9900 Black

MODEL	DIMENSIONS	VENTS	GROWING AREA
Cassandra 9900 (8' x 12')		4	9.9m <sup>2</sup>
Cassandra 11500 (8' x 14')		4	11.5m <sup>2</sup>
